izuzetno nam je zadovoljstvo predstaviti Vam ostvarene poslovne uspjehe Volksbank BH d.d. u 2008. godini.

Volksbank BH d.d. je prisutna na tržištu Bosne i Hercegovine od jula 2000. godine i sa krajem 2008. godine ostvarila je tržišno učešće od preko 4 %.

Ukupna aktiva banke povećana je za više od 25 % i sa krajem godine dosegla je iznos od cca. 859 miliona KM, kreditni volumen je porastao za cca. 29 %, dok volumen platnih transakcija bilježi rast veći od 38 %. U poređenju sa krajem 2007. godine depoziti građana smanjeni su za oko 4 %, što je uzrokovano povlačenjem depozita koje je zabilježeno u zadnjem kvartalu 2008. godine.

PRIVREDNO OKRUŽENJE

U 2008. godini nastavljen je trend održivog ekonomskog rasta iz prethodnih godina i sa 31.12.2008. godine prema procjenama iznosi 5,5 %.

Zbog rasta cijena energenata i hrane na svjetskom tržištu, koje su uticale i na rast cijena u Bosni i Hercegovini, inflacija je u prvom polugodištu prošle godine zabilježila rast, a svoj maksimum od 9,9 % dosegla je u julu 2008. godine. Padom cijena energenata i hrane, krajem godine došlo je i do pada inflacije. Prosječna godišnja inflacija iznosila je 7,4 %, dok je inflacija na godišnjem nivou, mjerena u decembru 2008. godine u odnosu na isti period 2007. godine, iznosila 3,8 %.

Vanjski dug Bosne i Hercegovine uredno je servisiran, a iznosio je 4,2 milijardi KM ili 16,7 % BDP-a.

U prošloj godini nastavljen je trend rasta kredita, ali je krajem godine došlo do značajnog usporavanja tog rasta. Ukupni krediti na kraju godine iznosili su 14,5 milijardi KM i veći su za 21,7 % u odnosu na kraj 2007. godine. Privrednim preduzećima zabilježen je rast kredita po stopi od 27,7 % a domaćinstvima po stopi od 17,8 %.

Centralna banka BiH je promijenila politiku investiranja deviznih rezervi. Naime, devizne rezerve su iz komercijalnih banaka prebačene u centralne banke zemalja Evropske Unije i u Banku za međunarodna poravnanja (BIS) u Bazelu, čime se Centralna banka BiH zaštitila od mogućih gubitaka po osnovu deviznih rezervi. Pri tome se Centralna banka BiH rukovala prvenstveno sigurnošću odnosno potrebom da osigura devizne rezerve, pa tek onda potrebom da ostvari profit.

Od oktobra 2008. godine, kada su komercijalne banke, zbog podizanja depozita, bile pod izvjesnim pritiskom, Centralna banka BiH je poduzela nekoliko mjera kako bi ojačala njihovu likvidnost. Prvo je smanjena stopa obavezne rezerve sa 18 % na 14 %. Potom su iz osnovice za obračun obavezne rezerve izuzete sve nove kreditne linije koje su komercijalne banke povlačile iz inostranstva. Posljednjom odlukom je uvedena diferencirana stopa obavezne rezerve, prema kojoj je stopa obavezne rezerve na depozite oročene na period duži od jedne godine smanjena sa 14 % na 10 %. Stopa obavezne rezerve na depozite koji ulaze u osnovicu za obračun obavezne rezerve, a čija je ročnost do jedne godine, ostala je 14 %.

Kao agent države u poslovima dodjele kreditnog rejtinga, Centralna banka BiH je posredovala između dvije međunarodne bonitetne agencije i državnih institucija prilikom dodjele kreditnih ocjena Bosni i Hercegovini. Moody's Investor Service potvrdio je isti kreditni rejting Bosni i Hercegovini 'B2' sa stabilnim izgledima, dok je Standard & Poor's dodijelila Bosni i Hercegovini 'B+' kreditni rejting sa stabilnim izgledima, što je za jedan nivo bolji rejting od onog koji je dodijelila agencija Moody's.

ANALIZA POSLOVANJA

POSLOVANJE SA PRAVNIM LICIMA

Osnovne karakteristike razvoja Odjela za poslovanje s pravnim licima mogu se opisati kroz značajan napredak u svim segmentima poslovanja. Značajna povećanja u kreditnom portfelju zajedno s većim porastom u poslovanju s naknadama predstavljaju primarne segmente ovog rasta koji nam je omogućio da povećamo konkurentnost i udio na tržištu. Kao rezultat toga, prihodi od naknada narasli su za preko 26,4 % u poređenju s prošlom godinom, čime se dostigla brojka od preko 3 miliona KM. Nadalje, kreditni portfelj je narastao za 58,6 %, odnosno sa 114,1 miliona KM na 180,9 miliona KM u 2008. godini. Zatim, rast i napredovanje ključnih finansijskih pokazatelja, uz specifičan pristup ličnog kontakta s našim klijentima, predstavljaju izuzetne osnove za buduće širenje i stalni razvoj naših usluga.

POSLOVANJE SA STANOVNIŠTVOM

Poslovanje sa malim preduzećima/samostalnim obrtnicima

Odjel Poslovanje sa malim preduzećima/samostalnim obrtnicima pokriva klijente prometa, prema zadnjem bilansu, u iznosu do 1 miliona KM. Na dan 31.12.2008. godine odjel je brojao 13 Savjetnika za mala preduzeća/samostalne obrtnike i 2 Suradnika za centralno vođenje računa.

Što se tiče kreditnog portfolija na 31.12.2008. godine stanje kredita je bilo 30,5 miliona KM, pri čemu je ukupan broj kreditnih partija iznosio 868. Također na dan 31.12.2008. godine Odjel Poslovanje sa malim preduzećima/samostalnim obrtnicima je brojao 2.127 klijenata.

Poslovanje sa fizičkim licima

U skladu sa poslovnom politikom Volksbank BH d.d., koja se fokusira na zahtjeve i potrebe klijenata, Banka je započela proces implementacije «Branch Concept-a» i uvela poziciju savjetnika za fizička lica u svojim poslovnim jedinicama, u cilju obezbjeđenja kvalitetnije usluge. Banka je podizala kvalitet usluga i kroz kontinuiranu edukaciju uposlenika, te posvećivala pažnju kontrolnim mjerama kvalitete usluga, kao što je projekat «Mystery Shopping». Navedene se aktivnosti razvijaju uz naglasak na standardizaciji procesa.

U području poslovanja sa stanovništvom nastavljen je trend širenja mreže filijala Volksbank BH d.d.. Otvorene su četiri nove poslovne jedinice i to: Banovići, Mostar-Šemovac, Brčko i Šentada. Ovim je broj poslovnih jedinica povećan na 29.

Banka bilježi pozitivne rezultate u prodaji tekućih računa, te debitnih i kreditnih kartica. U ponudu Volksbank BH d.d. uvedene su MasterCard i Maestro kartice. MasterCard kreditna kartica omogućuje kupovinu odnosno bezgotovinsko plaćanje roba i usluga na 28 miliona prodajnih mjesta u više od 120 zemalja svijeta, kao i podizanje gotovine na bankomatima. Maestro debitna kartica omogućuje podizanje novca na preko milion bankomata širom svijeta, a svoje izdatke pratite putem detaljnih mjesečnih izvoda.

Banka je u potpunosti prešla na čip-tehnologiju i otpočela izdavanje čip kartica za sve Volksbank kartične proizvode. Svi bankomati Volksbank BH d.d. su osposobljeni za prihvat čip-kartica, što povećava nivo zaštite Banke i klijenata od zloupotrebe.

Sa 31.12. 2008. godine Banka je imala 194,6 miliona KM depozita stanovništva, od toga 121,8 miliona KM oročenih depozita, te 72,8 miliona KM a'vista depozita i sredstava na žiro i tekućim računima.

Banka je sačuvala povjerenje svojih klijenata uprkos globalnoj finansijskoj krizi, te je navedeni nivo depozita stanovništva ostvarila zahvaljujući kvalitetnoj ponudi standardnih štednih proizvoda kao i uvođenjem novih proizvoda poput «MAGIC 7». U posljednjem kvartalu 2008. godine Volksbank BH d.d. je putem ovog proizvoda prikupila 3,4 miliona KM i 7,9 miliona EUR, od čega je većina depozita prikupljena od novih klijenata. To govori o visokom nivou povjerenja koje klijenti imaju u Volksbank BH d.d.

PLATNI PROMET

Sa 31.12.2008. godine nalozi unutrašnjeg platnog prometa primani su u 28 filijala, od čega su 2 u Republici Srpskoj, 2 u Brčko Distriktu BiH a 24 u Federaciji BiH.

Unutrašnji platni promet je djelimično decentralizovan, obzirom da filijale Banke imaju mogućnost unosa naloga do iznosa od 10.000,00 KM.

Pravna lica, koja obavljaju platni promet preko Volksbank BH d.d., imala su mogućnost korištenja elektronskog bankarstva, te je učešće naloga procesiranih elektronskim putem u ukupnom broju obrađenih naloga preko naše banke iznosilo 25,3 %.

Jedan od poslovnih ciljeva u 2009. godini predstavlja uključivanje što većeg broja klijenata u elektronsko bankarstvo, koje je sa stanovišta banke ocijenjeno kao jako efikasno.

U odnosu na 2007. godinu i broj i volumen platnog prometa u 2008. godini imao je tendencije rasta, te bi taj trend trebalo očekivati i u 2009. godini.

ODJEL SREDSTVA

Tokom 2008. godine Banka je održavala deviznu poziciju u okviru limita propisanih odlukom Agencije za bankarstvo Federacije BiH (FBA) i u okviru internih limita propisanih od strane Uprave banke i Volksbank International (VBI).

Aktivnosti banke kojima se usklađuje i održava devizna pozicija u zakonom propisanim limitima su kupoprodaja valuta, ugovaranje kredita sa deviznom klauzulom te praćenje depozita sa ugovorenom deviznom klauzulom.

Odjel Sredstva je uspješno obavljao sve aktivnosti vezano za upravljanje rizikom likvidnosti Banke, na način da je Banka u 2008. godini svakodnevno održavala ročnu usklađenost aktive i pasive prema zahtijevanim lokalnim propisima.

Banka se pored primljenih depozita od pravnih i fizičkih lica finansirala i kratkoročnim i dugoročnim pozajmicama na međunarodnom i domaćem bankarskom tržištu.

Upravljujući kamatnim rizikom Banka je održavala interne limite propisane od strane Uprave Banke i VBI, nastojeći da u isto vrijeme optimizira neto kamatni prihod.

Odjel Sredstva je u 2008. godini, pored depozitarskih poslova za Investicione fondove, depozitarskih poslova za brokerske kuće i naravno podrške u ostalim oblastima poslovanja na tržištu kapitala, ponudio novu uslugu skrbništva nad vrijednosnim papirima.

Projektom Skrbništva nastoji se omogućiti kako postojećim tako i potencijalnim klijentima da pronađu partnera u razvoju svog poslovanja upravo na jednom mjestu - u Volksbank BH d.d.

BILJEŠKE UZ FINANSIJSKI IZVJEŠTAJ

ZNAČAJNE RUKOVODSTVENE POLITIKE

Izjava o usklađenosti

Finansijski izvještaji Banke su pripremljeni u skladu sa statutarnim računovodstvenim pravilima Agencije za Bankarstvo Federacije Bosne i Hercegovine.

Funkcionalna valuta i valuta prezentiranja

Finansijski izvještaji prezentirani su u konvertibilnim markama («KM»), koja je funkcionalna valuta. Vrijednosti su zaokružene na najbližu hiljadu (ako drugačije nije navedeno)

Centralna Banka Bosne i Hercegovine („CBBiH“) provodi politiku kursa na principu „valutnog odbora“ prema kojem je KM vezana za EUR u odnosu 1:1,95583 koji je korišten u 2008. i 2007. godini. Očekuje se da će se ovo zadržati i u doglednoj budućnosti.

Preračunavanje stranih valuta

Transakcije u stranim valutama preračunavaju se u funkcionalnu valutu po kursu važećem na dan transakcije. Dobici i gubici po osnovu kursnih razlika koji nastaju prilikom izmirenja tih transakcija i po osnovi svođenja monetarne imovine i obaveza denominiranih u stranim valutama po kursu krajem godine priznaju se u bilansu uspjeha. Nemonetarna imovina i stavke u stranoj valuti koje se mjere po historijskom trošku preračunavaju se po tečaju na datum transakcije i ne preračunavaju se ponovno na datum bilanca stanja.

Prihodi i rashodi od kamata

Prihodi i rashodi od kamata priznaju se u bilansu uspjeha ili gubitka za obračunsko razdoblje na koje se odnose, uzimajući u obzir efektivni prinos na aktivu ili obaveze odnosno primjenjivu varijabilnu stopu, osim za kamatu na neprihodujuća sredstva koja je suspendirana i koja se priznaje po naplati. Prihodi i rashodi od kamata uključuju amortizaciju svakog diskonta ili premije ili drugih razlika između inicijalne knjigovodstvene vrijednosti kamatonosnog finansijskog instrumenta i iznosa po dospijeću, uz primjenu efektivne kamatne stope. Naknade za odobravanje zajmova uključene su u izračun efektivne kamate.

Prihod i troškovi od naknada i provizija

Prihodi od naknada i provizija sastoje se uglavnom od naknada za garancije, akreditive, domaća i međunarodna plaćanja, kartično poslovanje i ostale usluge koje pruža Banka gdje se naknade priznaju kao prihod po pružanju usluge.

Prihod od dividendi

Prihodi od dividendi po osnovu vlasničkih vrijednosnih papira priznaju se u bilansu uspjeha u trenutku nastanka prava za primitak dividende.

Materijalna imovina

Sva materijalna imovina se vrednuje po trošku umanjenom za akumuliranu amortizaciju i umanjenje vrijednosti.

Amortizacija se obračunava na svu imovinu, osim zemljišta i imovine u pripremi, prema linearnoj metodi kako bi se otpisao trošak nabave imovine kroz njezin procijenjeni vijek trajanja. Sljedeći procijenjeni korisni vijekovi se koriste:

Kompjuteri	5 godina
Namještaj i ostala oprema	6,5 – 10 godina
Motorna vozila	6,5 godina
Ulaganja u tuđu imovinu	12 godina

Metoda amortizacije i procijenjeni korisni vijek pregledaju se i korigiraju, ukoliko je potrebno, na svaki datum balansa.

Trošak redovnog održavanja direktno tereti dobit iz poslovanja. U iznimnim slučajevima, trošak ulaganja se kapitalizira ako održavanje rezultira povećanjem ili značajnim poboljšanjem predmetnih dijelova imovine.

Nematerijalna imovina

Nematerijalna imovina se vrednuje po po trošku umanjenom za akumuliranu amortizaciju i umanjenje vrijednosti. Troškovi razvoja kapitaliziraju se ako zadovoljavaju sve uvjete navedene u MRS-u 38.

Amortizacija se obračunava na svu imovinu, osim imovine u pripremi, prema linearnoj metodi kako bi se otpisao trošak nabave imovine kroz njezin procijenjeni vijek trajanja. Sljedeći procijenjeni korisni vijekovi se koriste:

Softver	5 godina
---------	----------

Metoda amortizacije i procijenjeni korisni vijek pregledaju se i korigiraju, ukoliko je potrebno, na svaki datum balansa.

Rezervacije

Rezervisanja se priznaju ukoliko Banka ima sadašnju zakonsku ili izvedenu obavezu proizašlu iz prošlih događaja za čije se podmirenje očekuje da će Banci stvoriti odljev resursa koji utjelovljuju ekonomske koristi, a moguće je napraviti pouzdanu procjenu

iznosa obaveze, ili kao što je propisano zakonom, u slučaju rezervisanja za neidentificirane gubitke po vanbilansnim izloženostima kreditnom riziku.

Rezervisanja za obaveze i troškove održavaju se na razini koju Uprava Banke smatra dovoljnom za pokrivanje nastalih gubitaka. Uprava utvrđuje dostatnost rezervacija na temelju uvida u pojedinačne stavke, tekuće ekonomske uslove, karakteristike rizika određenih kategorija transakcija, kao i druge relevantne činjenice.

Dionički kapital

Dionički kapital

Dionički kapital obuhvaća redovne i prioritetne dionice i izražava se u KM po nominalnoj vrijednosti. Svaka dobit za godinu poslije raspodjele se prebacuje u rezerve.

Dividende

Dividende na redovne dionice i prioritetne dionice priznaju se kao obaveza u periodu u kojem su odobrene od strane dioničara Banke.

Porez na dobit

Od 1. januara 2008. godine u Federaciji Bosne i Hercegovine donesen je novi Zakon o porezu na dobit sa kojim je smanjena stopa na dobit na 10%. Prema novom Zakonu o porezu na dobit za poreske svrhe nabavna vrijednost hardvera i softvera može se odbiti u cijelosti u godini u kojoj je izvršena nabavka.

Ako se nakon umanjenja osnovice poreza na dobit pokaže gubitak u poreznom bilansu, tada se taj gubitak iskazan u poreznom bilansu može prenijeti kao poreska olakšica na račun dobiti iz budućih obračunskih perioda, a ne duže od pet godina.

Porez na dobit priznat u bilansu uspjeha sadrži tekući porez i odgođeni porez. Porez obračunat na dobit prije poreza Banke razlikuje se od teorijskog iznosa koji bi nastao kada bi se koristila zakonska poreska stopa, i prikazan je ispod:

A) POREZ NA DOBIT PRIZNAT U BILANSU USPJEHA

ECONOMIC ENVIROMENT

Trend of the sustainable economic growth continued in 2008, as in the previous years, and according to the latest assessments it amounted to 5.5 %.

Because of the power resources and food prices increase at the global market, which influenced also the increase of prices in Bosnia-Herzegovina, the inflation for the first six months increased and achieved its maximum of 9.9 % in July, 2008. Reducing of power resources and food prices caused reducing of the inflation by the end of the year. Average annual inflation amounted to 7.4 % while the annual inflation, measured in December of 2008 compared to December 2007, amounted 3.8 %.

External debt of Bosnia-Herzegovina has been regularly served and it amounted KM 4.2 billion or 16.7 % of the GDP.

Trend of credit growth was continued last year, but with the significant slowing down by the end of the year. Total amount of credits by the end of year amounted KM 14.5 billion and it was the increase of 21.7 % comparing to the end of 2007. The increase of credits to corporate by 27.7 % rate was recorded, while the rate for households was 17.8 %.

The Central Bank of Bosnia-Herzegovina (CBBH) changed the foreign reserves investment policy. Namely, the foreign exchange reserves were removed from commercial banks into the central banks of the European Union and the Bank for the International Settlements (BIS) in Basel and this protected CBBH from the potential losses from the foreign exchange reserves investment. While doing this the CBBH firstly had in mind the security of its investments, i.e. the need to ensure the foreign currency reserves, and then the need to make profit.

Since October, 2008, when the commercial banks because of the deposits withdrawal were under the pressure, the CBBH has undertaken several measures in order to strengthen their liquidity. As the first step, the minimum rate of reserves requirement was reduced from 18 % to 14 %. Then, the new credit lines withdrawn from abroad by the commercial banks were taken out of the basis for required reserves calculation. By the last decision the CBBH introduced the differentiated required reserves rate, according to which the required reserves rate on the fix term deposits with the maturity over one year, was reduced from 14 % to 10 %. The required reserves rate on deposits with the maturity up to one year, which are included in the basis for calculation of the required reserves, remains at 14 %.

As the state agent in area of credit rating assignment, the CBBH intermediated between two international rating agencies and state institutions during credit rating assignment to Bosnia-Herzegovina. Moody's Investor Service confirmed the same credit rating to Bosnia-Herzegovina, «B2» with stable outlook, while the Standards & Poor's assigned «B+» credit rating with the stable outlook, which is one level higher rating than the one assigned by Moody's Agency.

LINES OF BUSINESS

CORPORATE BUSINESS

The main characteristics of the development of the Corporate Department may be described through an important improvement in all business segments. Significant boosts in the loan portfolio along with the major augmentation in the fee business represent the primary segments of this growth that enabled the bank to increase the competitiveness and the market share. As a result, the fees went up for 26.4 % when compared to the last year, thus reaching the figure of over KM 3 million. Furthermore, the loan portfolio grew for 58.6 %, from KM 114.1 million in 2007 to KM 180.9 million by the end of 2008. Thereupon, the growth and progress of the key financial indicators, with a particularly individual approach towards our clients, signify outstanding pillars for further expansion and constant development of our services.

RETAIL BUSINESS

Small Companies

The Retail Business Department covers clients whose turnover, according to their latest balance, is up to KM 1 million. As at 31st December 2008, the Department had 13 Retail Business Advisors Account Officers and 2 Associates for Central Keeping of Accounts Accountkeeping.

As to the loan portfolio as at 31st of December 2008, the loan balance was KM 30.5 million and the total number of loan lines was 868. In addition, as at 31st December 2008, the Retail Business Department had 2,127 clients.

Private Clients

In accordance with the Volksbank BH d.d. business policy, which focuses on clients' demands and needs, the Bank has begun the process of implementing the new «Branch Concept» and introduced a position of Adviser for Physical Entities in their respective business units with a view to providing more quality service. The Bank also raised the quality of services through ongoing education of employees and it paid attention to service quality control measures, such as is the project «Mystery Shopping». The said activities have been developed with a focus on the standardisation of the process.

In the field of business operations with private clients, the trend of expanding the network of Volksbank BH d.d. branch offices has continued. Four new business units were opened, as follows: Banovići, Mostar-Šemovac, Brčko and Šentada. Following this, the number of business units has increased to 29.

The Bank has positive results in the realization of current accounts and debit and credit cards. MasterCard and Maestro cards have been included in the Volksbank BH d.d. offer. The MasterCard credit card makes it possible to purchase, that is, to render cashless payment for goods and services at 28 million selling sites in more than 120 countries worldwide, as well as the withdrawing of cash from ATMs. The Maestro debit card makes it possible to withdraw money from over one million ATMs worldwide and card holders

can monitor their expenses through detailed monthly bank statements. The Bank has completely adopted the chip technology and started issuing chip cards for all Volksbank BH d.d. card products. All Volksbank BH d.d. ATMs are now capable of accepting chip cards, which increases the level of bank and clients' protection against abuses.

As at 31st December 2008, the Bank had KM 194.6 million in private clients' deposits. Of this figure KM 121.8 million were time deposits, KM 72.8 million were sight deposits and funds on current and giro accounts.

The Bank has preserved the trust of its clients despite the global financial crisis and it affected the indicated level of private clients' deposits owing to the quality offer of standard savings products, as well as by introducing new products such as «MAGIC 7». Through this product, Volksbank BH d.d. collected KM 3.4 million and EUR 7.9 million in the last quarter of 2008 and most deposits within these amounts were collected from new clients. This speaks in favour of a high level of trust which clients have in Volksbank BH d.d.

PAYMENT TRANSACTIONS

As at 31st December 2008 payment orders in the domestic payment transaction system (DPTS) were being received in 28 branch offices which include 2 in Republika Srpska, 2 in Brčko District of Bosnia-Herzegovina and 24 in the Federation of Bosnia-Herzegovina.

The domestic payment transaction system is partially decentralised, so that the Bank branch offices have a possibility to accept payment orders amounting up to KM 10 thousand.

Legal entities carrying out their payment transactions via Volksbank BH d.d. had the possibility to use electronic banking and, consequently, the share of electronically processed payment orders in the total number of processed orders via our bank was 25.3 %.

One of the business goals in 2009 is to additionally increase the number of clients using electronic banking, which the bank, from its perspective, assessed as very efficient.

Number and volume of transactions in 2008:

Description of DPTS transactions	No. of DPTS transactions	Volume in KM 000
Inflows	369,595	1,333,032
Payments	581,204	1,357,746
Total	950,799	2,690,778

Foreign payment transactions are carried out through a various number of correspondent banks worldwide. Payment transactions with foreign countries are centralised and all transfer orders from branch offices are sent to the Head Office for execution.

Compared to 2007, the number and volume of payment transactions in 2008 had upward trend and this trend is to be expected also in 2009.

Number and volume of transactions in 2008:

Transaction description	No. of transactions	Volume in KM 000
Inflows	20,940	277,864
Payments	15,534	433,884
Total	36,474	711,748

TREASURY

During 2008, the Bank kept the foreign-currency item within the limit provided for in the Federation Banking Agency (FBA) Decision and also within the limits provided for by the Bank Management and Volksbank International (VBI).

The Bank activities with which the foreign-currency item is adjusted and kept within the legally prescribed limits are: trading with currencies, contracting of loans with a foreign currency clause and monitoring of deposits with a contracted foreign currency clause.

The Treasury was successfully carrying out all bank-solvency risk management activities in such a way that in 2008 the Bank kept the time balance between assets and liabilities on a daily basis, in accordance with the relevant local legislation.

In addition to deposits received from legal and physical entities, the Bank was also financed through short-term and long-term borrowings on the international and domestic banking market.

By managing interest risk, the Bank was maintaining the internal limits prescribed by the Bank Management and the VBI, at the same time making efforts to optimise the net interest income.

In 2008, the Treasury, in addition to deposit related transactions for investment funds, deposit related activities for brokerage houses and, of course, support in other fields of business operation on the market of capital, offered a new service - security custody.

With the Custody Project, efforts are being made to enable both existing and potential clients to find a partner in the development of their businesses at one place – in Volksbank BH d.d.

NOTES TO THE FINANCIAL STATEMENTS

SIGNAFICANT ACCOUNTING POLICES

Statement of compliance

These financial statements have been prepared in accordance with the accounting regulations of the Banking Agency of the Federation of Bosnia-Herzegovina.

Functional and presentation currency

The financial statements are presented in Bosnian Convertible Marks ("BAM"), which is the functional currency. Amounts are rounded to the nearest thousand (unless otherwise stated).

The Central Bank of Bosnia-Herzegovina ("CBBH") implemented a currency board arrangement aligning BAM to EURO at an exchange rate of EUR 1: BAM 1.95583 throughout 2008 and 2007. This is expected to continue in the foreseeable future.

Foreign currency transactions

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement. Non-monetary assets and items that are measured in terms of historical cost in foreign currency are translated using the exchange rate at the date of the transaction and are not retranslated at the balance sheet date.

Interest income and expense

Interest income and expense are recognised in the income statement as they accrue, taking into account the effective yield of the asset or liability or an applicable floating rate, except for interest on non-performing assets, which is suspended and recognised when collected. Interest income and expense include the amortisation of any discount or premium or other differences between the initial carrying amount of an interest bearing instrument and its amount at maturity calculated on an effective interest rate basis. Origination fees are included in the calculation of effective interest.

Commission and fee income and expenses

Commission and fee income comprises mainly fees receivable from customers for guarantees, letters of credit, domestic and foreign payments, card business and other services provided by the Bank, where the fee is credited to income when the related service is performed.

Dividend income

Dividend income from equity securities is recognised in the income statement when the rights to receive the dividend are established.

Tangible assets

Tangible assets are measured at cost less accumulated depreciation or impairment losses.

Depreciation is provided on all assets except land and assets in the course of construction on a straight line basis at prescribed rates designed to write off the cost over the estimated useful lives of the assets. The following estimated useful lives are used:

Computers	5 years
Furniture and equipment	6.5 – 10 years
Motor vehicles	6.5 years
Leasehold improvements	12 years

Depreciation method and useful lives are reassessed, and adjusted if appropriate, at each reporting date.

Regular maintenance expenditure is directly charged against operating profit. Maintenance expenditure is capitalised in exceptional cases where maintenance results in an enlargement or substantial improvement of the respective assets.

Intangible assets

Intangible assets acquired by the Bank are stated at historical cost less accumulated amortisation and impairment losses. Expenditure on development activities is capitalised if all of the features required by IAS 38 are satisfied.

Depreciation is provided on all intangible assets except assets in the course of construction on a straight line basis at prescribed rates designed to write off the cost over the estimated useful lives of the assets. The following estimated useful lives are used:

Software	5 years
----------	---------

Depreciation method and useful lives are reassessed, and adjusted if appropriate, at each reporting date.

Provisions

Provisions are recognised when the Bank has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made, or as required by law in the case of provisions for unidentified impairment of off-balance-sheet credit risk exposures.

Provisions for liabilities and charges are maintained at the level that the Bank's management considers sufficient for absorption of incurred losses. The management determines the sufficiency of provisions on the basis of insight into specific items, current economic circumstances, risk characteristics of certain transaction categories, as well as other relevant factors.

Share capital

Share capital

Share capital comprises ordinary and preference shares and is stated in BAM at nominal value. Any profit for the year after appropriations is transferred to reserves.

Dividends

Dividends on ordinary shares and preference shares are recognised as a liability in the period in which they are approved by the Bank's shareholders.
